*The laboratory applies a flexible approach to the scope of accreditation.*

*The current list of activities carried out within the flexible scope is available from the laboratory on request at lab@vuhz.cz in the form of the „List of activities within the flexible scope of accreditation“.*

*The laboratory provides opinions and interpretations of the test results.*

*Detailed information on activities within the scope of accreditation (determined analytes/ tested subject) is given in the section „Specification of the scope of accreditation“.*

<sup>1</sup> asterisk at the ordinal number identifies the tests, which the laboratory is qualified to carry out outside the permanent laboratory premises; the numerical index at the test ordinal number identifies the location carrying out the test (the identification of the locations is given on the first page of this document)

<sup>2</sup> if the document identifying the test procedure is dated, only these specific procedures are used. If the document identifying the test procedure is not dated, the latest valid edition of the specified procedure is used (including any changes)

<sup>3</sup> degrees of freedom: A – Flexibility concerning materials/products (subject of the test), B – Flexibility concerning components/parameters/characteristics, C – Flexibility concerning the performance of the method, D – Flexibility concerning the method

The laboratory can modify the test procedures with the specified degree(s) of freedom in the scope of accreditation while maintaining the principle of measurement. If no degree of freedom is specified, the laboratory cannot apply a flexible approach to the scope of accreditation for the test.

**Specification of the scope of accreditation:**

Ordinal test number	Detailed information on activities within the scope of accreditation (determined analytes)
1	Mn, Cu, Ni, Pb, V, Cr
2	C, Mn, Si, P, S, Cr, Ni, Mo, V, W, Ti, Al, Cu, Co, B, Nb
5	Mg, Ca, Ni, Cu, Zn, Cd, Pb
